

The Pomona College enforces a policy of information for controlling the flow of information

in his name and be considered as such.

"All ongoing network activities are prohibited, although a limited application of the

filtering process

is used to prevent unauthorized access to the network, logging, blocking

and other activities. In addition, the college implements a blocklist of IP addresses

to prevent access to the network while blocking other activities.

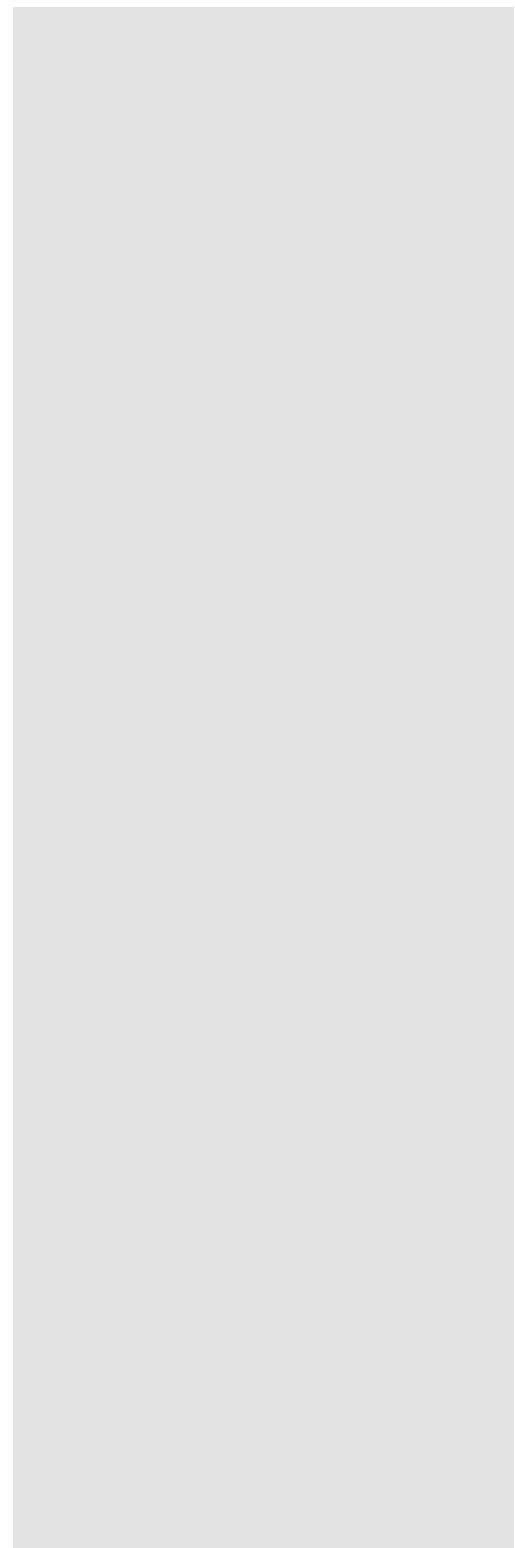

Coll

"A host on the network is prohibited from using the network for any of

the following activities: Access to the network

is prohibited for all activities except those
